THANK YOU for selecting an Eljer bathing product. To ensure this product is installed properly, please read these instructions carefully before you begin. Certain installations may require professional help. Also be sure your installation conforms to local codes.

- Please unpack carefully and identify all parts needed for installation. Inspect to product and report any damages or missing parts immediately to customer care by calling 855-815-0004.
- Wear protective equipment during installation to avoid injury.
- Please keep these instructions for after care and customer service detail.

**WARNING: PRODUCT IS HEAVY AND REQUIRES TWO PEOPLE FOR INSTALLATION.**

IMPORTANT SAFETY INSTRUCTIONS

INSTRUCTIONS PERTAINING TO A RISK OF FIRE, ELECTRIC SHOCK OR INJURY TO PERSONS

READ AND FOLLOW ALL INSTRUCTIONS!

⚠️ DANGER: Risk of personal injury. Do not permit children to use this unit without adult supervision.

⚠️ WARNING: Risk of personal injury. Do not operate this unit without the guard over the suction fitting.

⚠️ WARNING: Risk of electric shock. Do not permit electrical appliances (hair dryer, telephone, radio, etc.) within 60 inches (1524 mm) of this unit.

⚠️ WARNING: Risk of hyperthermia and possible drowning. People using medications and/or having adverse medical history should consult a physician before using this product.

⚠️ WARNING: Risk of personal injury. Do not overfill unit before entering. Entering tub when filled more than 2/3 can cause overflow and slippery conditions. Exercise caution when entering and exiting.

⚠️ WARNING: No Food or Alcoholic Beverages. Use of your bathtub immediately after meals is not recommended. Avoid alcohol consumption before or during bathing. Alcoholic beverages can cause drowsiness or hyperthermia resulting in loss of consciousness or even drowning.

⚠️ WARNING: Pregnancy. If you are or think you may be pregnant, consult your physician before using the bathtub.

Never drop or insert any object into any opening.

Use this unit only for its intended use as described in this manual. Do not use any attachments not recommended by Eljer.

The unit must be connected only to a supply circuit that is properly protected by a ground-fault circuit-interrupter (GFCI). Such a GFCI should be provided by the installer and should be tested on a routine basis. To test the GFCI, push the test button. The GFCI should interrupt power. Push the reset button. Power should be restored. If the GFCI fails to operate in this manner, the GFCI is defective. If the GFCI interrupts power to the bathtub without the test button being pushed, a ground current is flowing, indicating the possibility of an electric shock. Do not use this hydromassage bathtub. Disconnect the hydromassage bathtub and have the problem corrected by a licensed electrician before using.

A pressure wire connector is provided on the exterior of the motor unit to permit connection of a no. 8 AWG solid copper bonding conductor between this unit and all other electrical equipment and exposed metal in the vicinity, as needed to comply with local requirements. To reduce the risk of an electric shock, connect this connector to the grounding terminal of your electric service or supply panel with a conductor equivalent in size to the circuit conductors supplying this unit.

SAVE THESE INSTRUCTIONS
Installation and Framing Instructions

Each bath arrives ready for installation, completely equipped with the pump and plumbing necessary for operation. A drain/overflow kit is required for each bath and it is not included.

The variety of installations for this bath may require framing procedures other than those shown. Locate studs as required. Ensure roughing-in dimensions are proper, plumb and square.

⚠️ Remove the bath from the carton. Retain the shipping carton until satisfactory inspection of the product has been made. Do not lift the bath by the plumbing at any time; handle by the shell only.

⚠️ All bath units are factory tested for proper operation and watertight connections prior to shipping. Prior to installation and before enclosing with wallboard, tile, etc., the bath must be filled with water and operated to check for leaks that may have resulted from shipping damage or mishandling.

⚠️ The sumps of these baths are not supported by the feet and additional sump support is required. Once the bath is in place, the rim of the bath should contact the stringer or pier but supports no weight.

⚠️ Provisions must be made in all installations for an access opening for servicing the bath pump. Unless an access opening of at least 12" x 24" (305mm x 610mm) is provided, warranty service will not be performed. It is strongly recommended that an additional opening be provided for access to drain components.

⚠️ Each bath has a nominal length (L), width (W), and Height (H) along with a rim height. Unless otherwise noted in the following rough-in references, assume that the nominal tolerances are as much as +/-1/4 inch (6mm). Therefore, it is strongly recommended that the installer build the surrounding structure after receiving the actual bath. Structural measurements should be verified against the actual bath received to ensure proper fit.
INSTALLATION AND FRAMING INSTRUCTIONS

The variety of installations possible for this whirlpool may require framing procedures other than those shown. Locate studs as needed. Ensure roughing-in dimensions are proper, plumb and square. Provisions must be made in all installations for an access opening for servicing the pump and controls. It is strongly recommended that an additional opening be provided for access to the drain components. The apron should not be used as the primary access opening.

1. Position the whirlpool into the installation opening and level the deck in both directions, shimming the integral leveling feet IF necessary. Mark the final position of the underside of the deck by tracing a line on to the studs (see Figure 1).

2. Remove the whirlpool and attach a 1 x 4 stringer to the studs, with the top of the stringer touching the traced line.

⚠️ The rim of the bath must not support weight.

3. Install drain components to the whirlpool following the drain installation instructions. Before replacing your whirlpool for final installation, be certain that an opening has been provided in the sub-floor for the drain. See the roughing-in drawing and Table 1 for suggested opening size (shadowed) and location dimensions. The drain/overflow of the bath extends below the bottom of the bath. Note that this requires a cutout in the floor.

⚠️ The floor structure beneath the bath must be able to support a total weight of bath, water, and bather. Refer to Table 1 under total weight for your model.

The bath must be supported along it’s entire bottom. Use mortar as bedding material (do not use sand or foam). Apply enough mortar to support the complete bottom of the bath. After the mortar has been poured, and before it sets, position whirlpool or bath until the rim is leveled against the leveling stringers or mounting surfaces (see “Typical Installations”) shown below.

⚠️ The rim of the bath must not support weight. If foundation base is used, allow the bedding material to completely harden before applying weight to the rim or bottom of the bath. Any finish material such as tile or wall board must be self-supporting if it contacts the deck of the bath.

CABRILLO MODEL 025-0142R/L

PROVIDE ACCESS TO PUMP
ELECTRICAL INSTALLATION INSTRUCTIONS

All wiring must be performed by a licensed electrician in accordance with the national electrical code and all other applicable codes.

WARNING: RISK OF ELECTRIC SHOCK

When using electrical products, basic precautions should always be observed, including the following:

1. Connect only to a circuit protected by a ground-fault circuit interrupter.

2. Grounding is required. The unit should be installed by a licensed electrician and grounded.

3. Install to permit access for servicing.

4. All building materials and wiring should be routed away from the pump body and heater (if equipped).

AIR SWITCH WHIRLPOOLS

The whirlpool should be installed on a 120 vac, 15 amp dedicated circuit. The circuit should be hard-wired from the electrical power supply panel. The circuit must be a three (3) wire circuit from the electrical supply panel. A grounded neutral wire and a third wire, earth ground, are essential. A SEPARATE 15 AMP MAXIMUM GFCI CIRCUIT IS REQUIRED IF THE OPTIONAL HEATER IS INSTALLED (SEE INSTALLATION INSTRUCTIONS SUPPLIED WITH THE HEATER MODEL NUMBER – 494-1000).

NOTE: DO NOT USE A WALL MOUNTED TIMER TO CONTROL THE HEATER.

ELECTRICAL DIAGRAM
READ AND FOLLOW ALL INSTRUCTIONS
ELECTRICAL INSTALLATION INSTRUCTIONS (continued)

WHIRLPOOL PLUS AIR BATH COMBINATIONS
The whirlpool pump should be installed on a 120 vac, 15 amp dedicated circuit. The blower/lights should be installed on a separate 120 vac, 15 amp dedicated circuit. The circuit should be hard-wired from the electrical power supply panel. The circuit must be a three (3) wire circuit from the electrical supply panel. A grounded neutral wire and a third wire, earth ground, are essential. **A SEPARATE 15 AMP MAXIMUM GFCI CIRCUIT IS REQUIRED IF THE OPTIONAL HEATER IS INSTALLED (SEE INSTALLATION INSTRUCTIONS SUPPLIED WITH THE HEATER MODEL NUMBER – 494-1000).** **NOTE: DO NOT USE A WALL MOUNTED TIMER TO CONTROL THE HEATER.**

TOTAL MASSAGE CIRCUIT WITH OPTIONAL HEATER

PUMP INSTRUCTIONS
1. ON/OFF PUMP:
   1st Press — The blower starts. 2nd Press — The blower stops.

2. PUMP SPEED VARIATION:
   1st Press — Press & hold to increase the pump speed, release pressure at the desired speed.
   2nd Press — Press & hold to decrease the pump speed, release pressure at the desired speed.

3. PUMP CYCLES:
   1st Press — Wave Cycle - Speed goes gradually from maximum to minimum.
   2nd Press — Pulse Cycle - Speed goes rapidly from maximum to minimum.
   3rd Press — Return to medium speed.

BLOWER INSTRUCTIONS
1. ON/OFF BLOWER:
   1st Press — The blower starts. 2nd Press — The blower stops.

2. SPEED VARIATION:
   1st Press — Press & hold to increase the blower speed, release pressure at the desired speed.
   2nd Press — Press & hold to decrease the blower speed, release pressure at the desired speed.

3. BLOWER CYCLES:
   1st Press — Wave Cycle - Speed goes gradually from maximum to minimum.
   2nd Press — Pulse Cycle - Speed goes from minimum the straight back to maximum.

ADVANCE PROGRAMMING
INTEGRATED 20 MINUTE AUTOMATIC TIMER:
Integrated 20 minute automatic timer on each system.

DRYING CYCLE:
A 1 minute automatic drying cycle will start 20 minutes after the blower is turned off.

CHROMATHERAPY INSTRUCTIONS
1. ON/OFF CHROMATHERAPY:
   1st Press — Starts the chromatherapy in white. White is only available when system starts.
   2nd Press — Chromatherapy stops.

2. PREVIOUS COLOR / SPEED INCREASE:
   Press — Press return to to the previous color.
   On Rainbow cycle: increase the speed.
   Hold to quickly change between colors.
   Release at the desired color.

3. NEXT COLOR / SPEED DECREASE:
   Press — Press return to to the next color.
   On Rainbow cycle: decrease the speed.
   Hold to quickly change between colors.
   Release at the desired color.

4. CHROMATHERAPY CYCLE:
   1st Press — Rainbow cycle starts.
   2nd Press — Stops on current color.
   3rd Press — Turquoise.
   4th Press — Back to rainbow mode.
OPERATING INSTRUCTIONS
1. Fill the bath to at least 3 inches above the jets before activating the pump.
2. The pump is activated by an on/off switch. Each depression of the button switches the power either on or off.
   Do not repeatedly depress the switch in rapid order if you do not see the whirlpool function right away,
   as it may take a few seconds before you can see it fully operating.
3. If any factory installed fittings are removed do not operate the unit. A safety hazard may occur.
4. Do not use bubble bath when you operate the whirlpool pump.
   This might cause excessive foaming.
5. Both air and whirlpool systems are plumbed in a way that water will
   drain from the plumbing easily.

ON-OFF SWITCH
The whirlpool bath pump is activated by an on-off switch. Each depression of the switch will
actuate the pump. If off, one depression will turn the pump on. If on, the next depression
will turn it off.

ADJUSTABLE FLOW:
The water flow action may be adjusted from vigorous to soft by rotating the nozzle clockwise for vigorous and
clockwise for soft.
Your Eljer whirlpool is designed to give you many years of pleasure with reasonable care and maintenance.

Your new acrylic bathtub is tough, durable and easy to care for. The colors have been formulated to match other Eljer fixtures and enhance your choice of bathroom decorations. The high gloss surface will retain its lasting luster with proper care and maintenance.

CLEANING AND MAINTENANCE:

- Always fill the tub with temperate water. Excessively hot water (greater than 130˚ F) may cause surface damage.
- Remove bath mat after use and hang to dry. Allowing bath mat to dry in the tub may cause surface damage.
- Clean after use with a mild liquid household detergent cleaner. Do not turn on jets when such cleaners are present.

Do not use:

- Lestoil® Cleaner; Lysol® Disinfectant (spray or concentrate); or Lysol® Basin, Tub and Tile Cleaner;
- Windex® Cleaner; Mr. Clean® Cleaner; Dow® Disinfectant Bathroom Cleaner*; or other cleaning products in aerosol cans.

1. Fill whirlpool with warm water and add two teaspoons of powdered automatic dishwasher (not laundry) detergent and one-half cup of household bleach to filled whirlpool. Activate whirlpool system in accordance with operating instructions and run system for two minutes.

2. Drain and refill whirlpool with cold water. Circulate for five minutes.

3. Drain whirlpool completely after step 3 (above) is completed.

NOTE: Any other servicing should be performed by a qualified service representative.

AS AMERICA, INC. LIMITED LIFETIME WARRANTY FOR
ELJER PREMIERE SERIES ACRYLIC TUBS, WHIRLPOOLS AND AIR BATHS

AS America, Inc. (“American Standard”) warrants to the original consumer purchaser that it will, at its option, repair or replace this acrylic tub, whirlpool or air bath, or any of its parts that are found by American Standard, in its sole judgment, to be defective under normal residential use and maintenance so long as it is owned by the original consumer purchaser.

THIS WARRANTY SHALL BE VOID IF THE ACCESS PANEL TO THE WHIRLPOOL IS COVERED IN ANY MANNER CONTRARY TO THE INSTALLATION INSTRUCTIONS. In no event will American Standard be liable for the cost of repair or replacement of any installation materials including but not limited to tiles, marble etc.

This limited lifetime warranty DOES NOT COVER the following:
1. Defects or damages arising from shipping, installation, alterations, accidents, abuse, misuse, lack of proper maintenance and cleaning as directed in the owner’s manual and use of other than genuine American Standard replacement parts, in all cases whether caused by a plumbing contractor, service company, the owner or any other person.
2. Deterioration through normal wear and tear and the expense of normal maintenance.
3. Commercial application. THE PRODUCTS ARE NOT INTENDED FOR COMMERCIAL USE.
4. Options and accessories. American Standard’s limited lifetime warranty on product modifications or customizations, including factory installed accessories, is lifetime for parts and shell and five (5) years on labor. This lifetime limited warranty covers accessories manufactured by American Standard that are included and installed at the time of sale (e.g. aprons, drains, grab bars, trim kits) against manufacturing defects of material or workmanship. Warranty coverage begins on the date the accessory was originally purchased by the owner.
5. American Standard’s limited warranty on the heater is two (2) years and five (5) years on labor. For optional after market accessories, refer to the manufacturers warranty included with those accessories. Warranty coverage begins on the date of original purchase by the owner.
6. Postage or shipping costs for returning products for repairs or replacement under this limited lifetime warranty and labor or other costs incurred in connection with product removal or installation are not covered under this limited warranty.
7. ANY LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES, ALL OF WHICH ARE HEREBY EXPRESSLY DISCLAIMED, OR THE EXTENSION BEYOND THE DURATION OF THIS LIMITED WARRANTY OF ANY IMPLIED WARRANTIES, INCLUDING THOSE OF MERCHANTABILITY OR FITNESS FOR AN INTENDED PURPOSE. (Some jurisdictions do not allow limitations on how long an implied warranty lasts, or the exclusion or limitation of incidental or consequential damages, so these limitations and exclusions may not apply to you.)
8. Responsibility for compliance with local code requirements. (Since local code requirements vary greatly distributors, retailers, dealers, installation contractors and users of plumbing products should determine whether there are any code restrictions on the installation or use of a specific product.)

This limited lifetime warranty gives you specific legal rights. You may have other statutory rights that vary from state to state or province to province, in which case this limited warranty does not affect such statutory rights.

For service under this warranty, call or write (and include a description of the product model and of the defect) to the applicable customer service location:
